

FACULTÉ DES SCIENCES ET TECHNOLOGIES

(FST)

TROISIÈME ANNÉE

Rapport du travail de Laboratoire NO 3

Cours : Réseau

Étudiant : Carnégie PIERRE

Professeur : Ismaël SAINT AMOUR

Le 11/2/2026

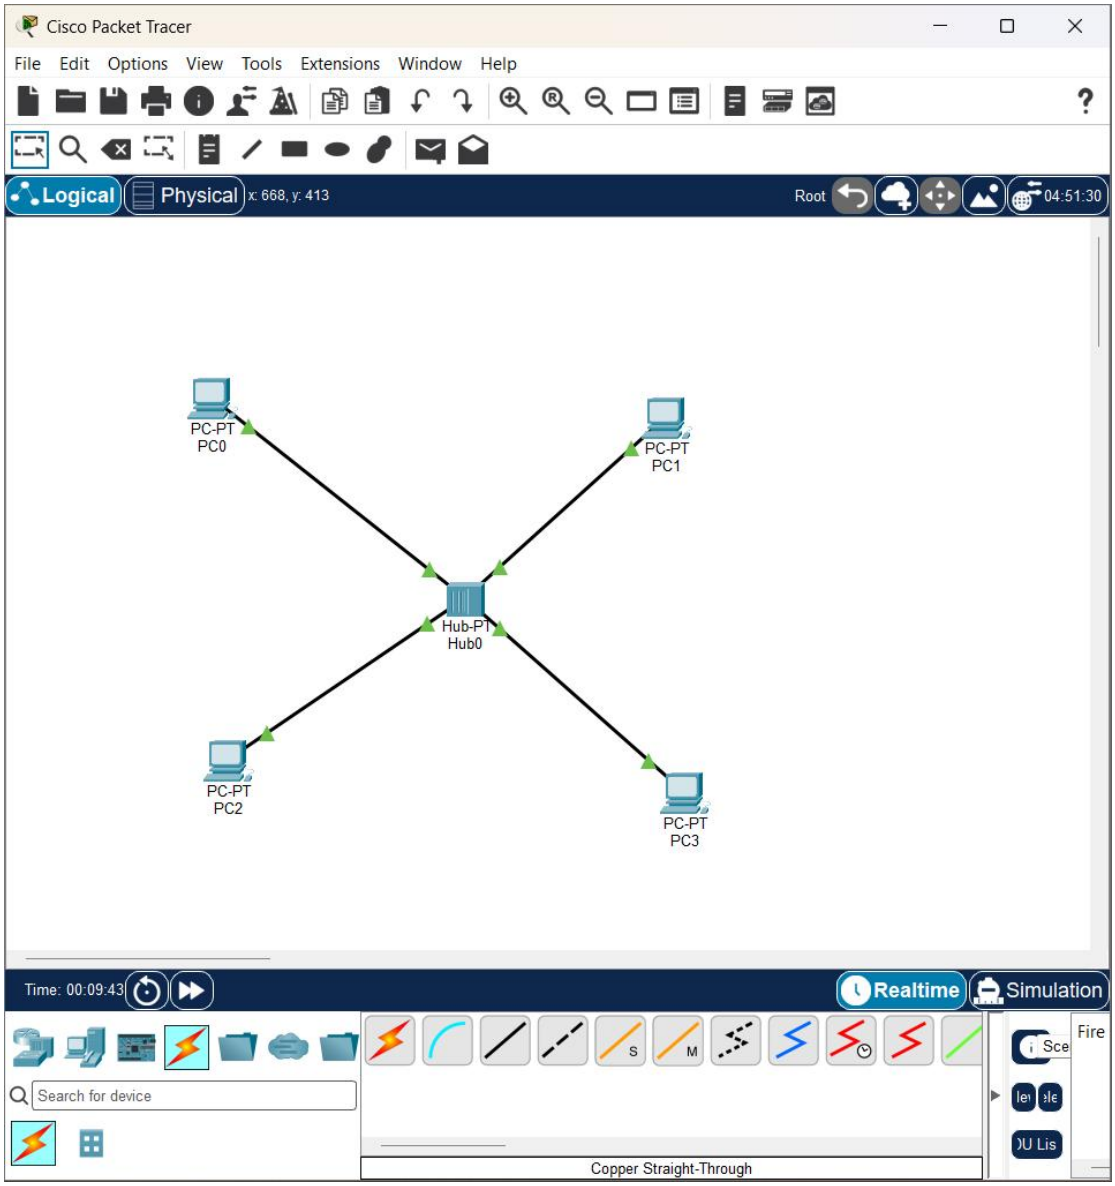

L’objectif de ce TD est de

Savoir attribuer des adresses IP valides aux machines,comprendre l’adressage IPv4 et IPv6 et vérifier la connectivité avec les commandes ping et ping ipv6.

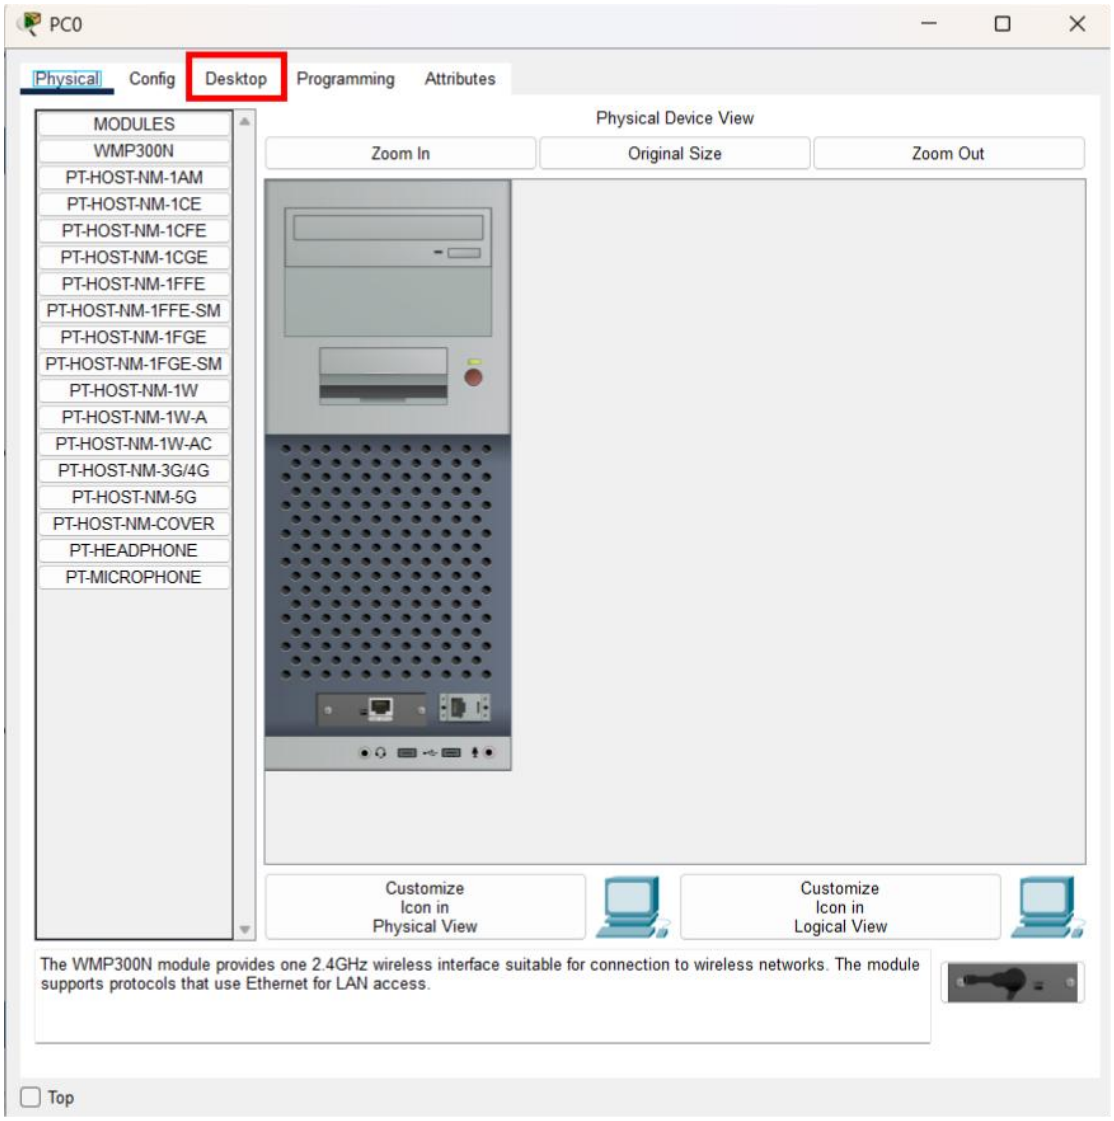

Travaux dirigés

Reproduire des topologies en configurant les adresses IPv4 et IPv6 puis vérifier leur connectivité.

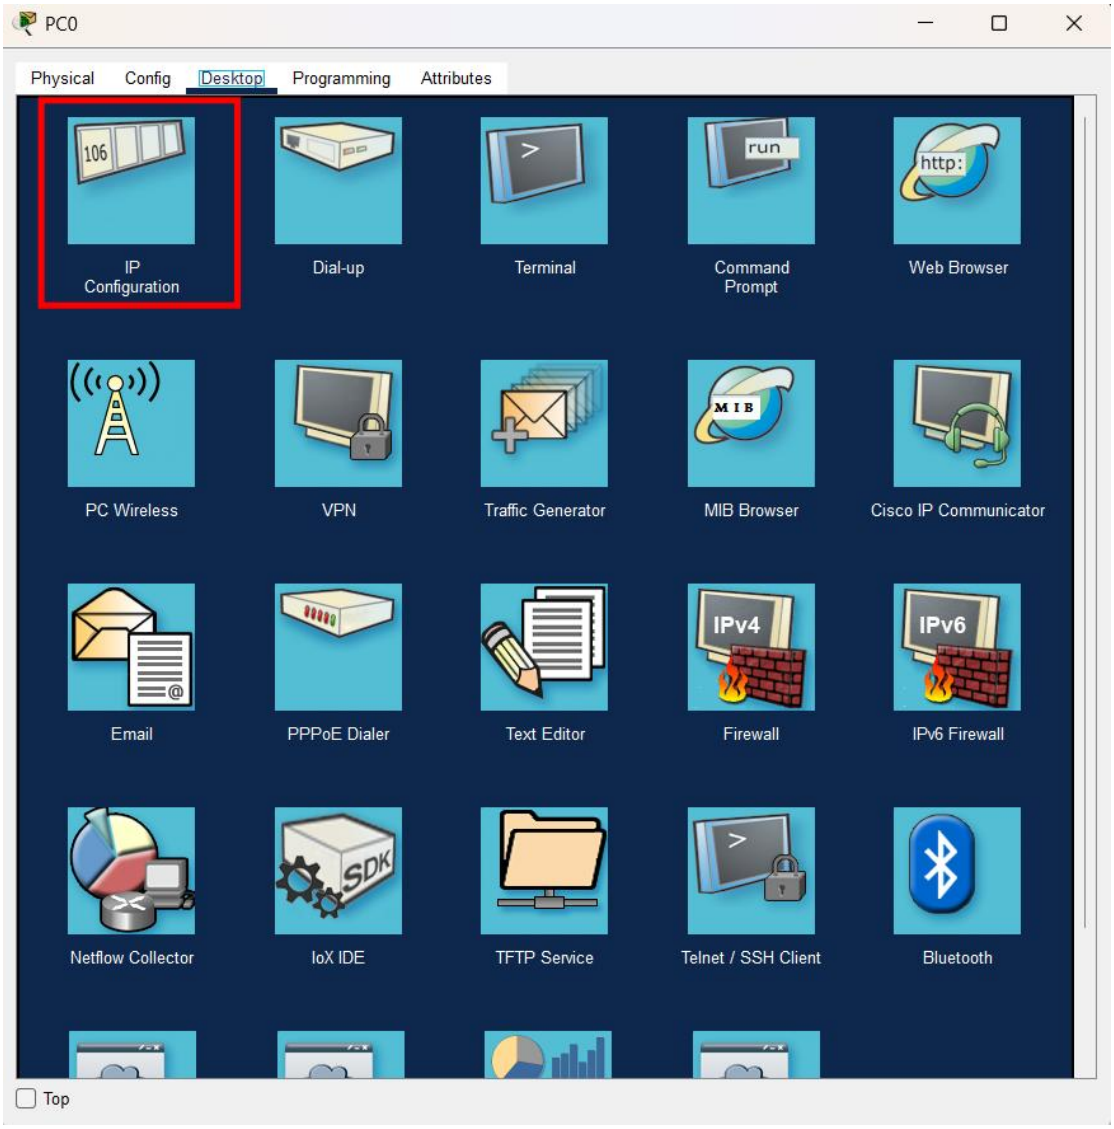

Représentation d’une topologie ayant un Hub et 4 PC connectés au switch.

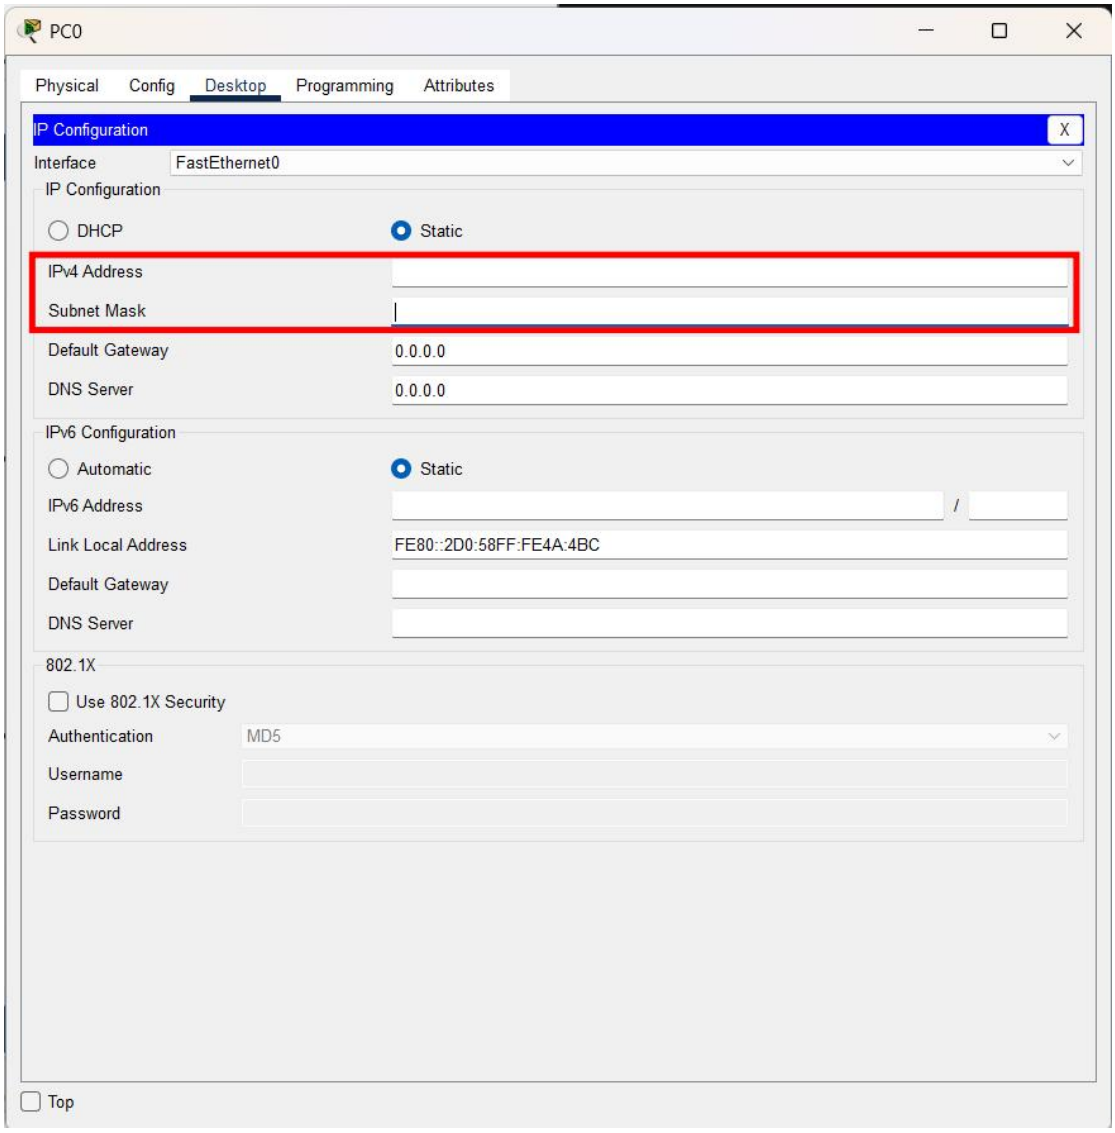

Configurations des adresses IPv4

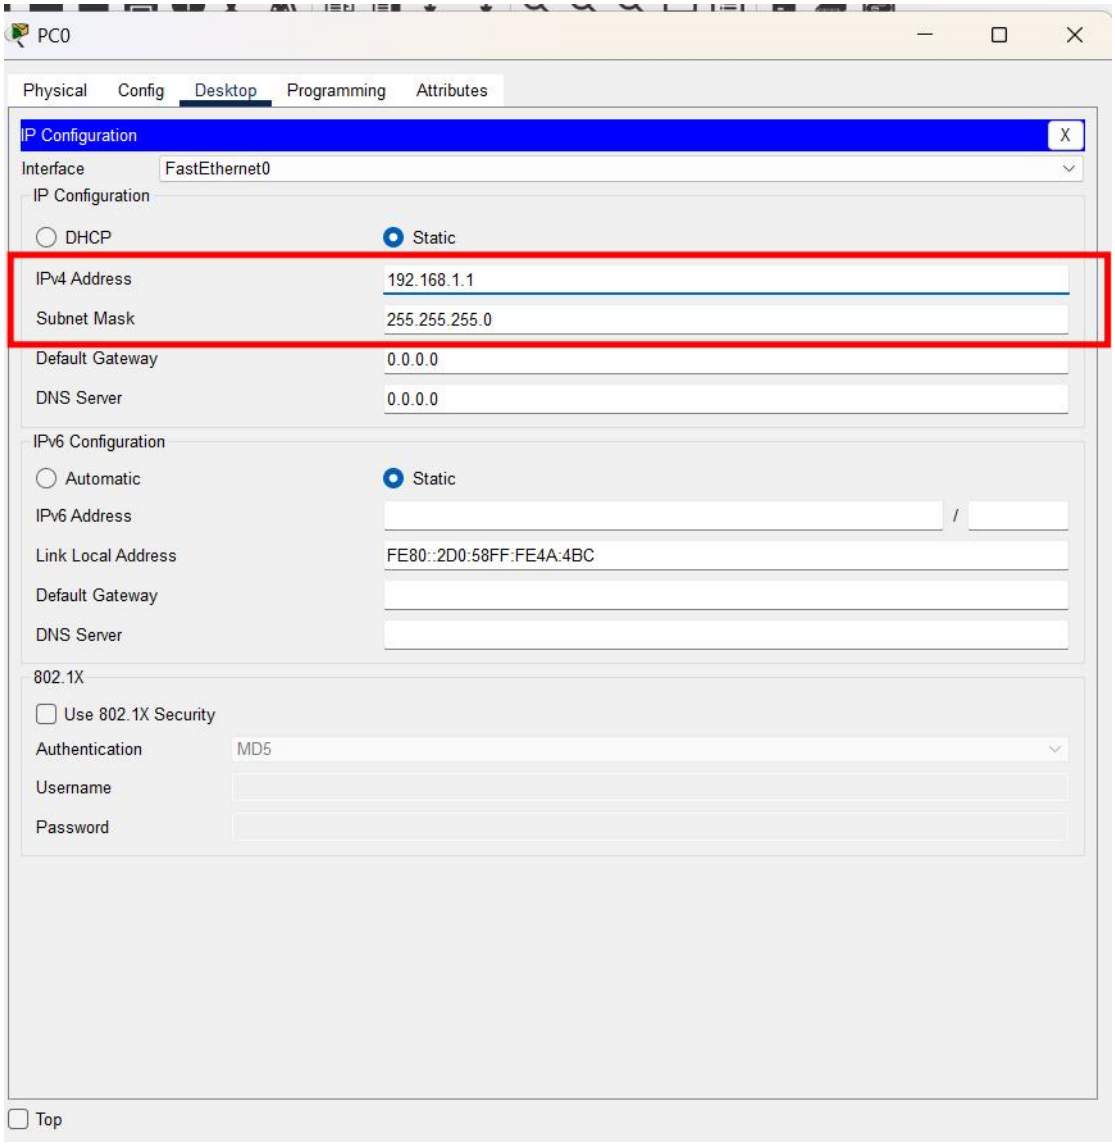

Suite de la configuration

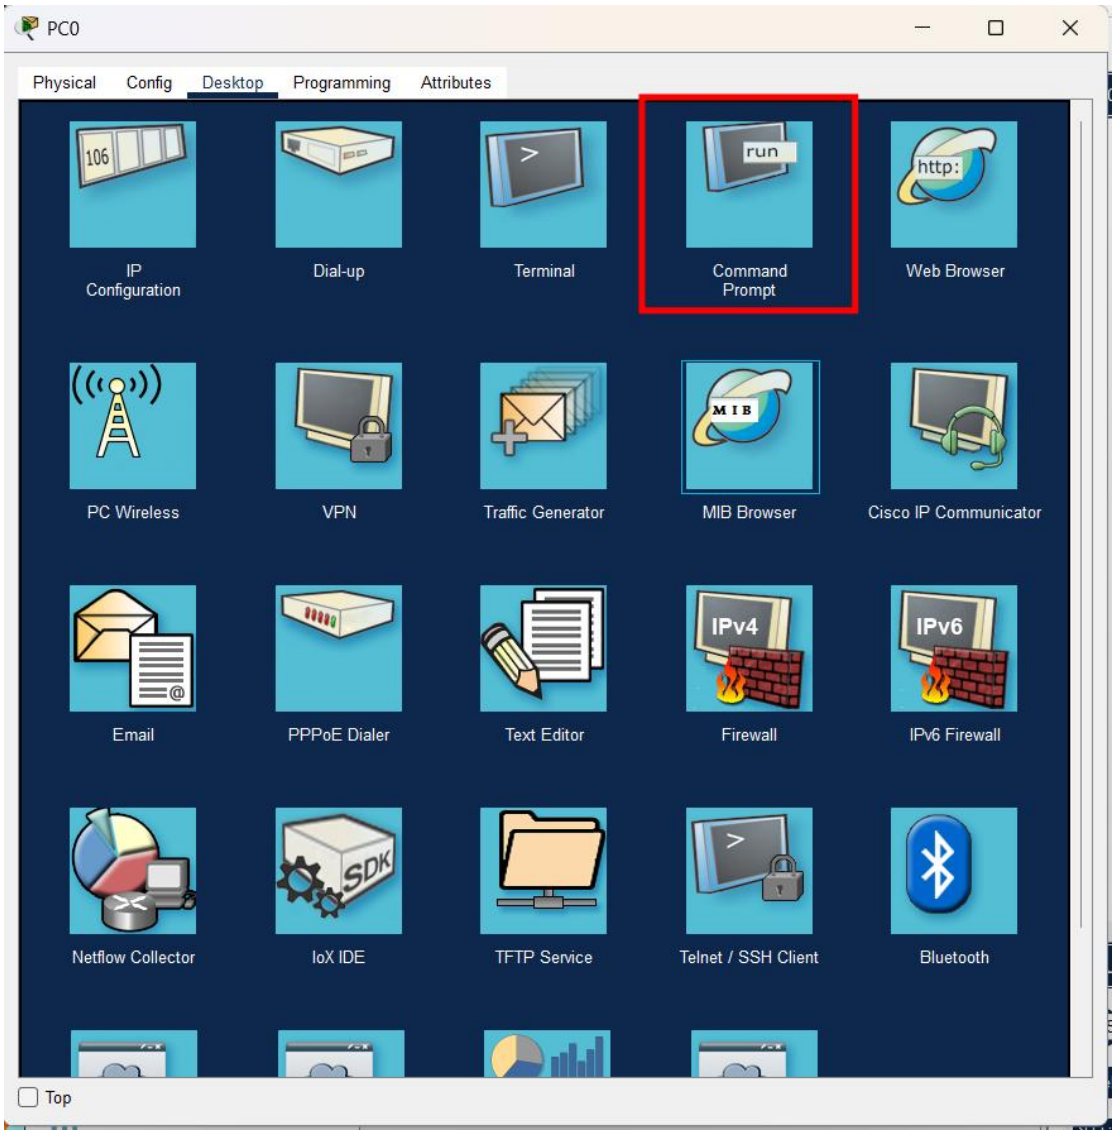

Suite de la configuration

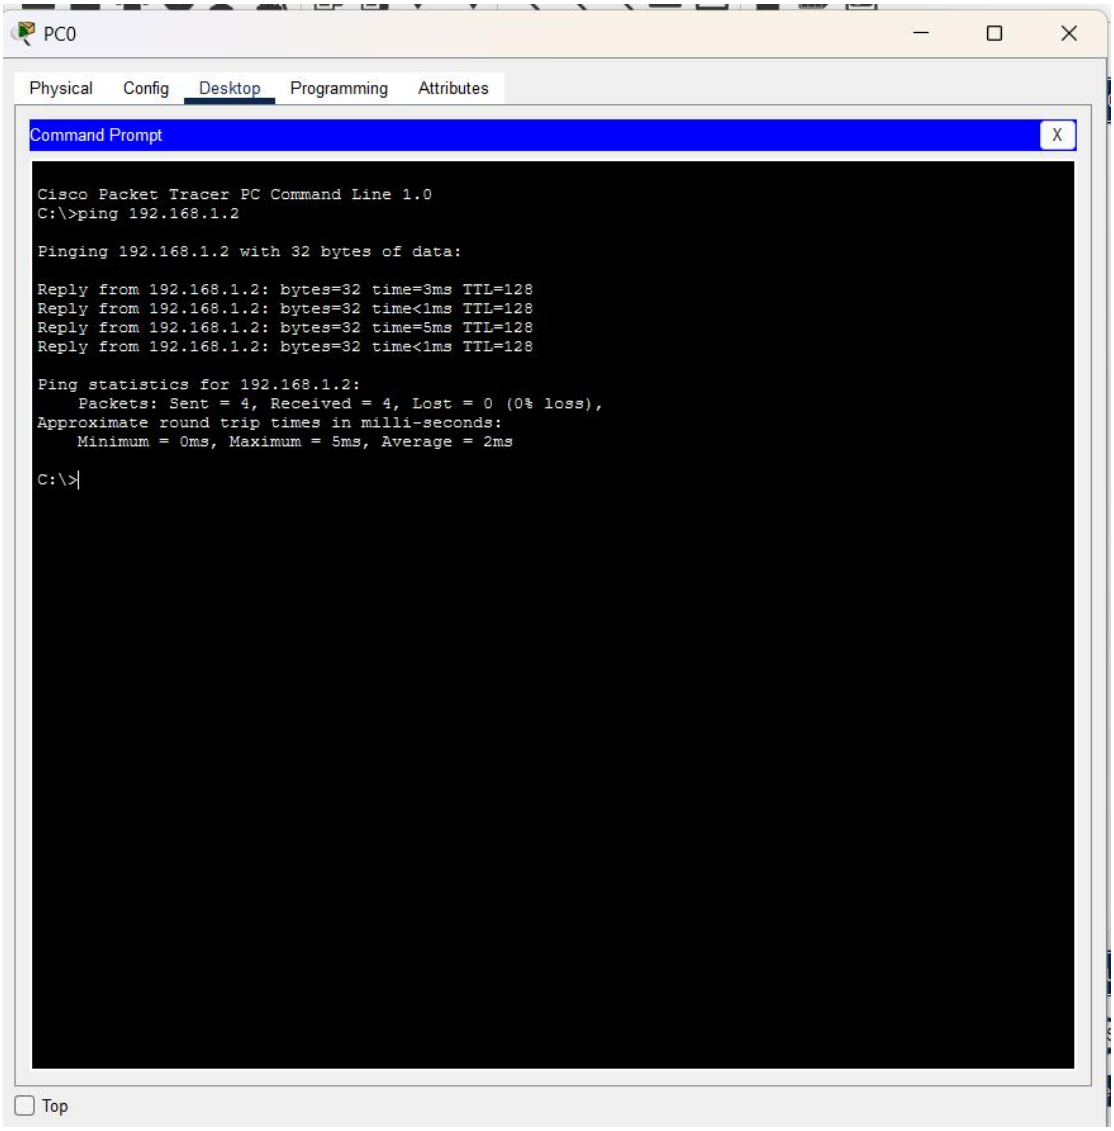

Suite de la configuration

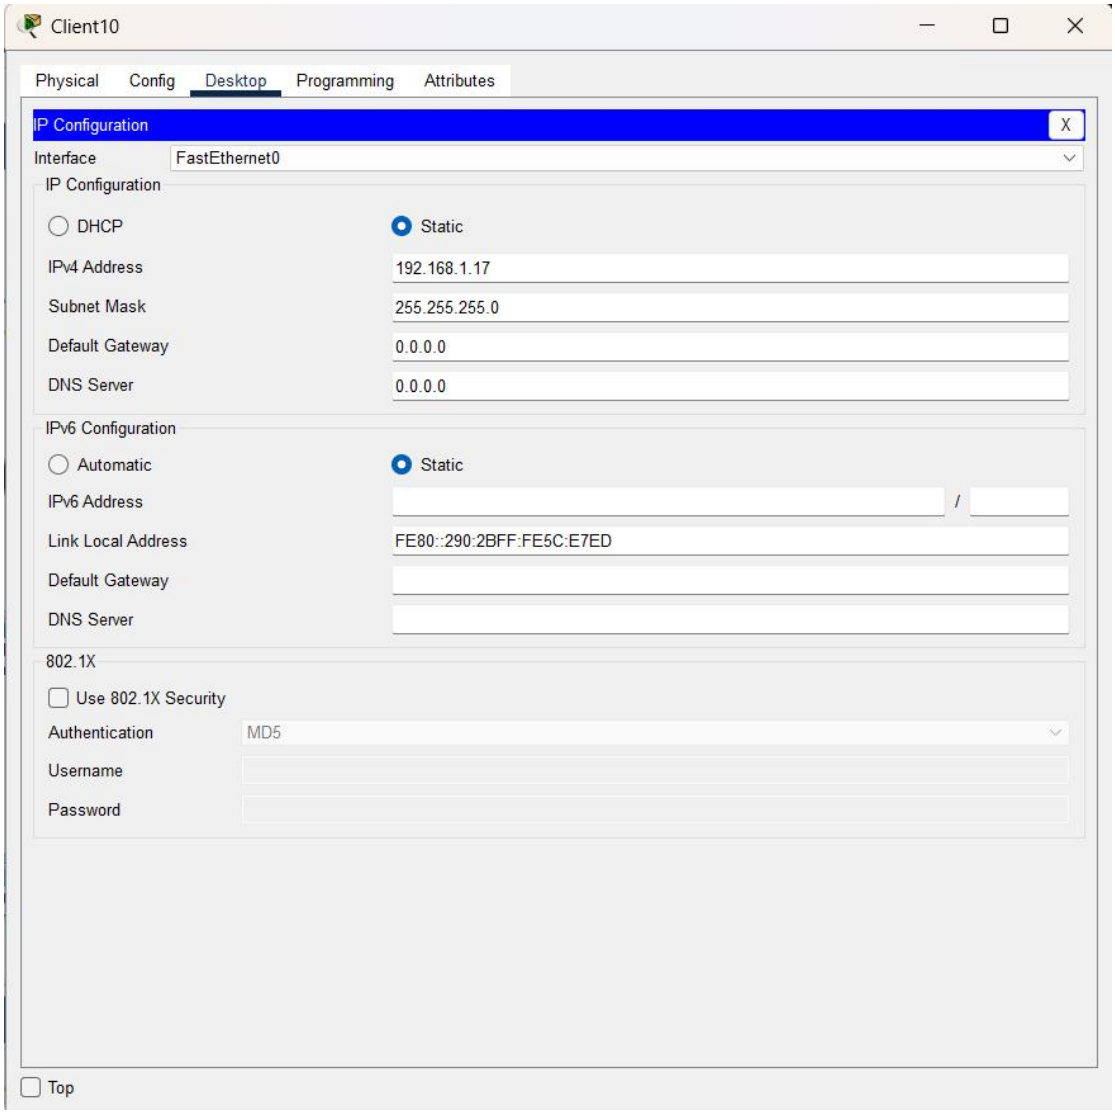

Vérification de la connectivité

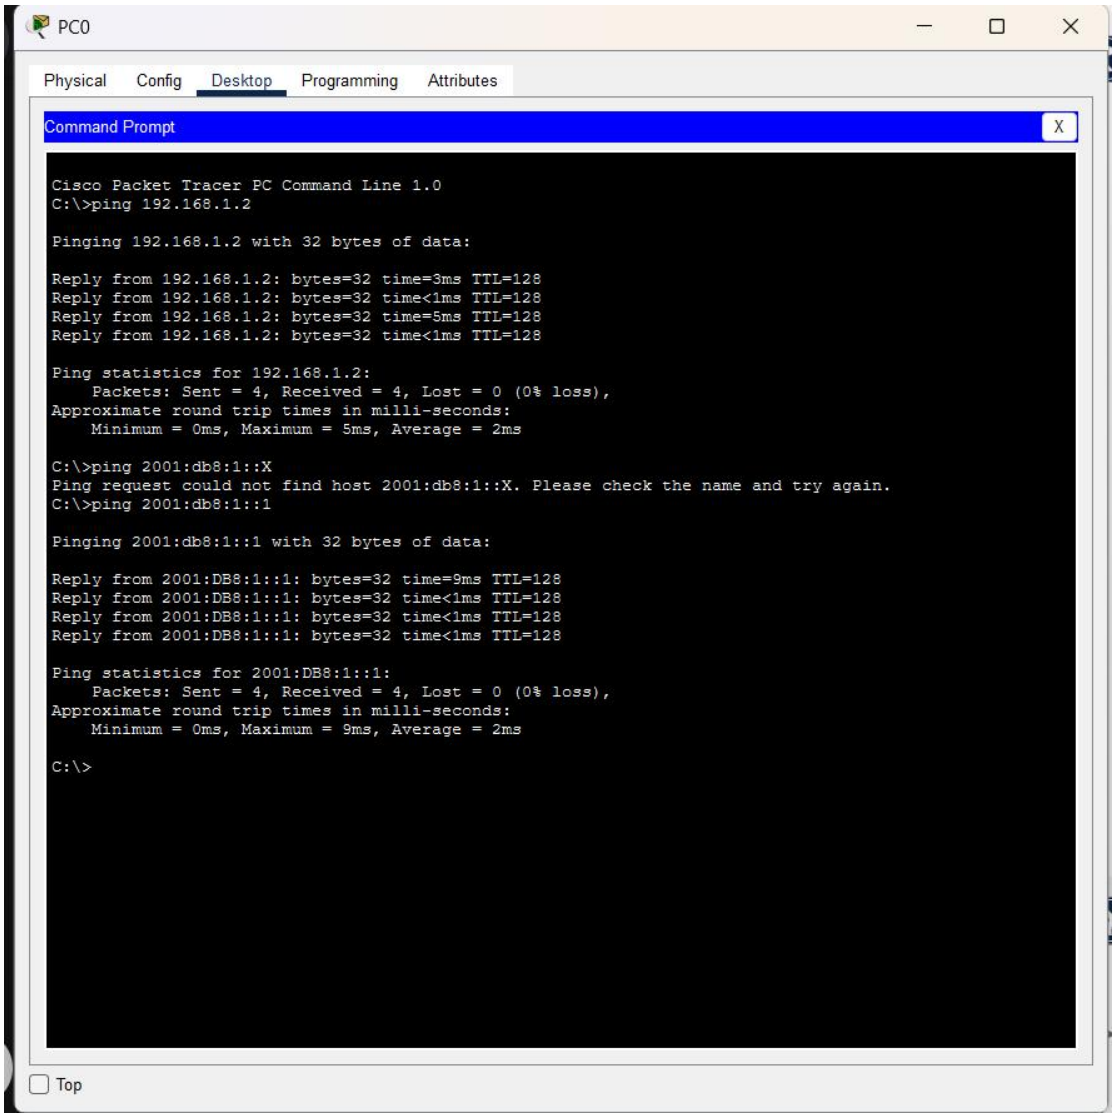

Vérification de la connectivité pour l'IPv4(Suite)

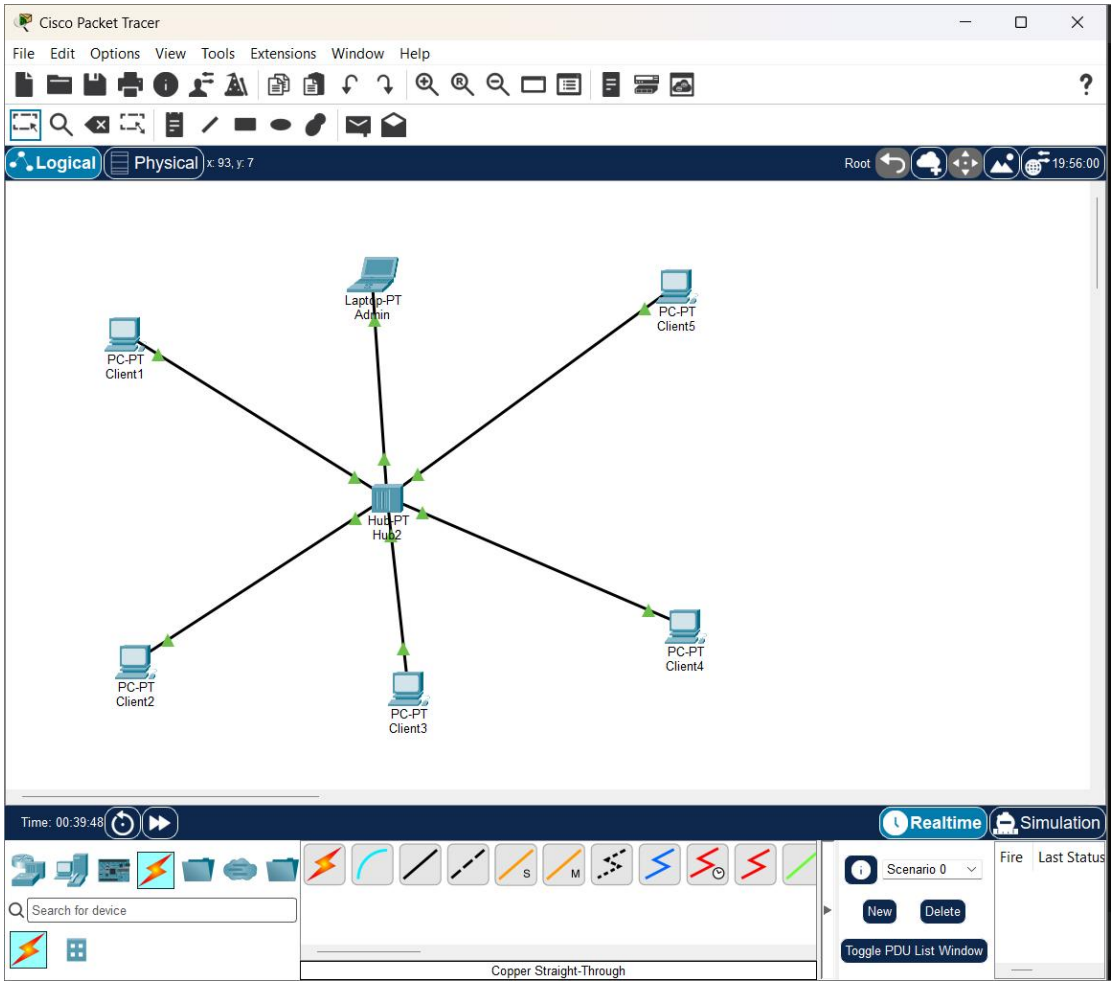

Configurations des adresses IPv6

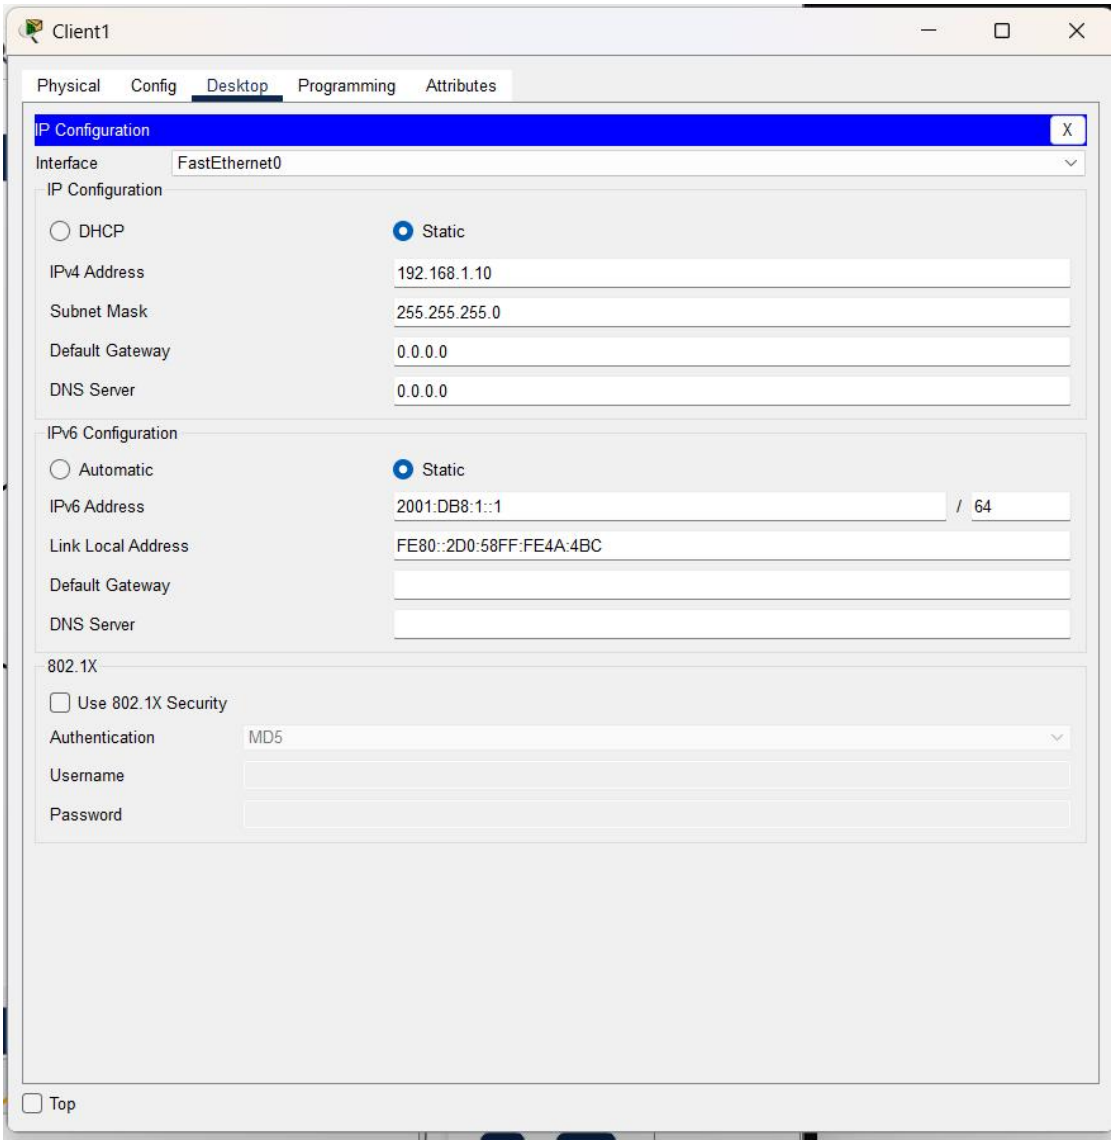

Vérification de la connectivité pour l'IPv6

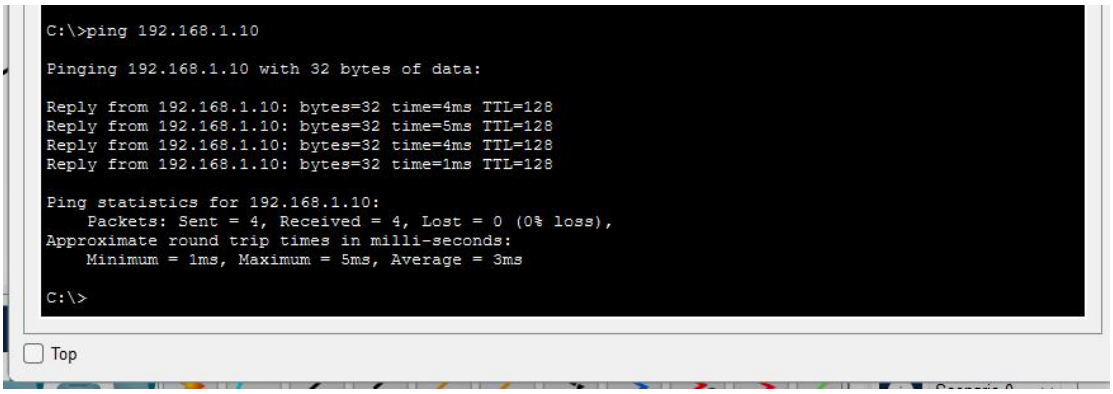

Reproduction des topologies données

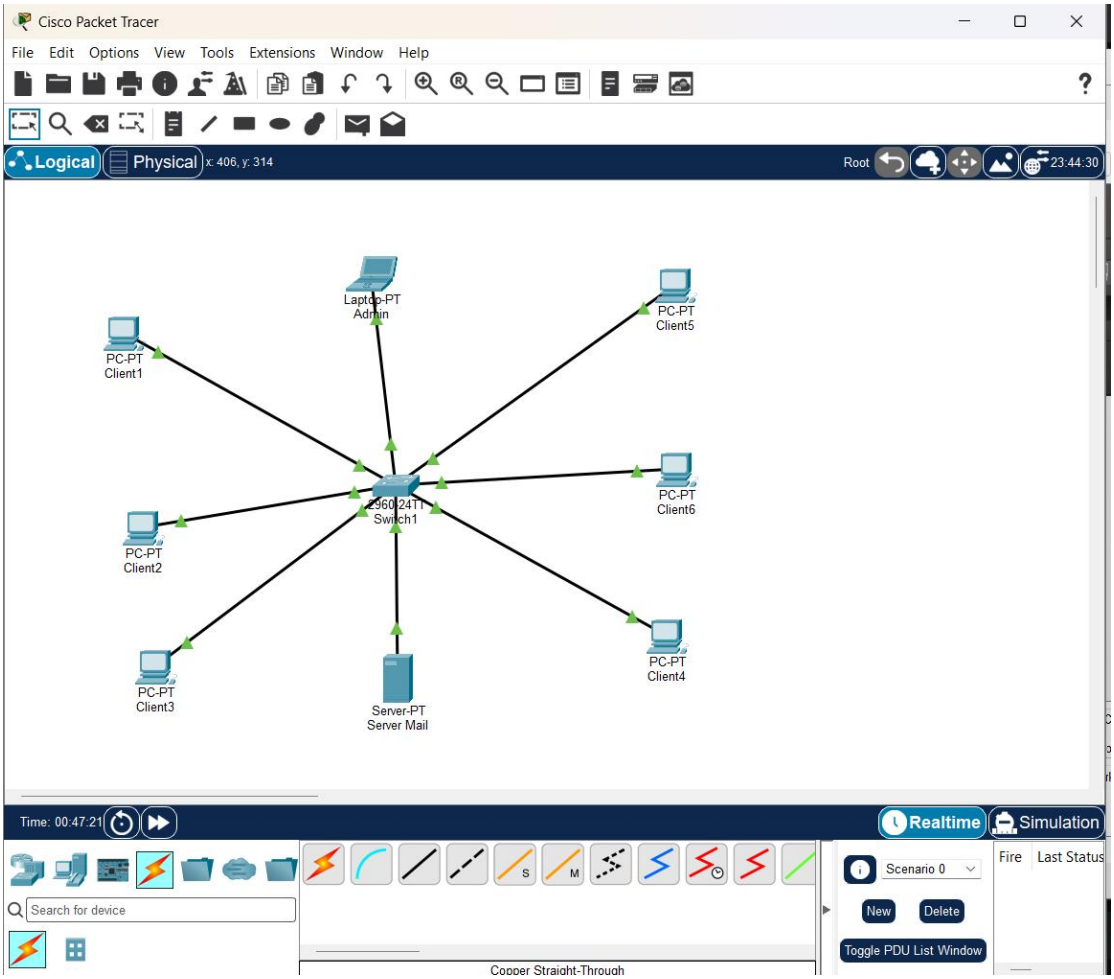

Assignation des adresses IPv4

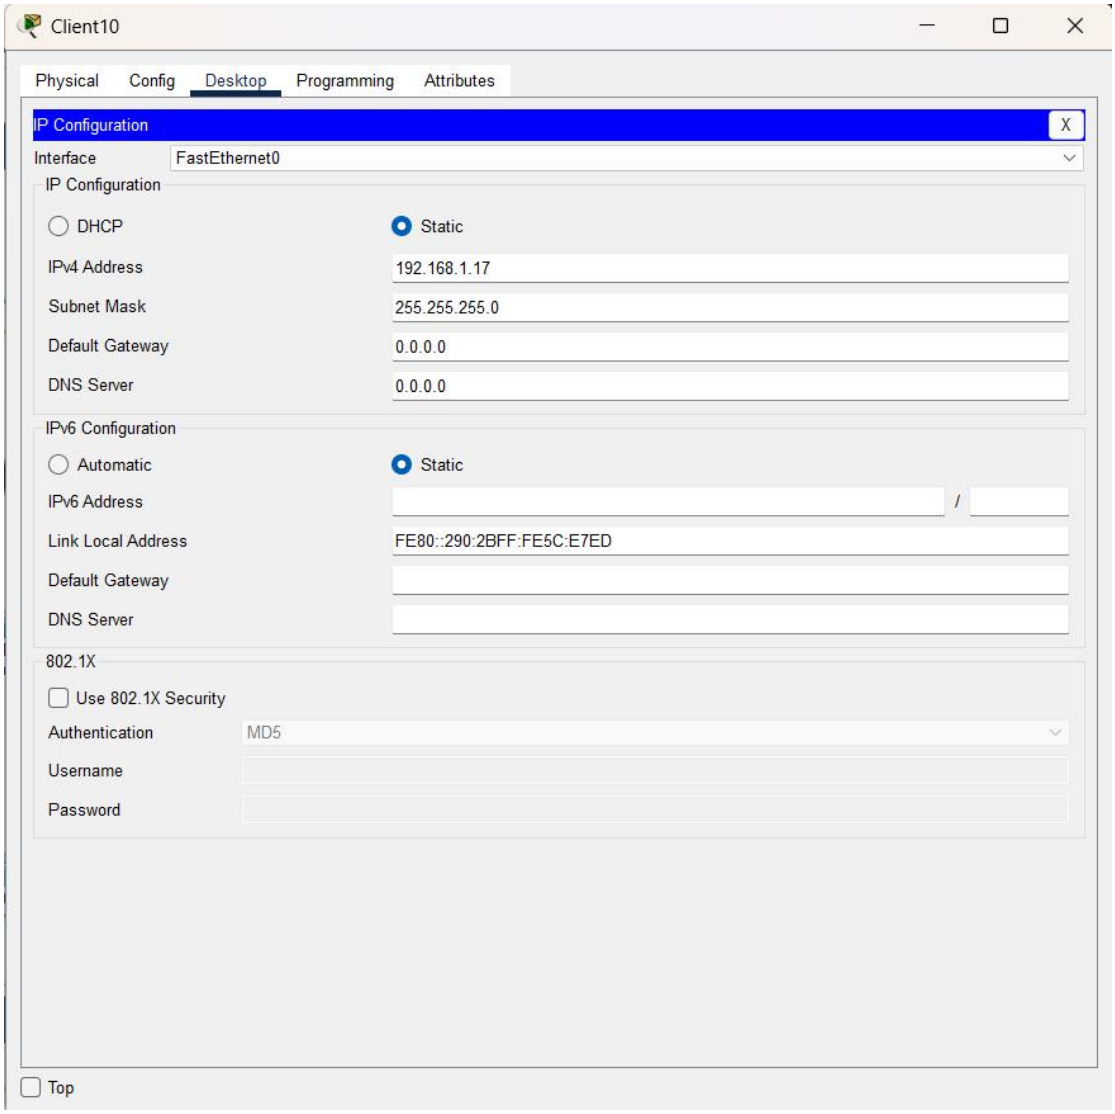

Vérifications des connectivités

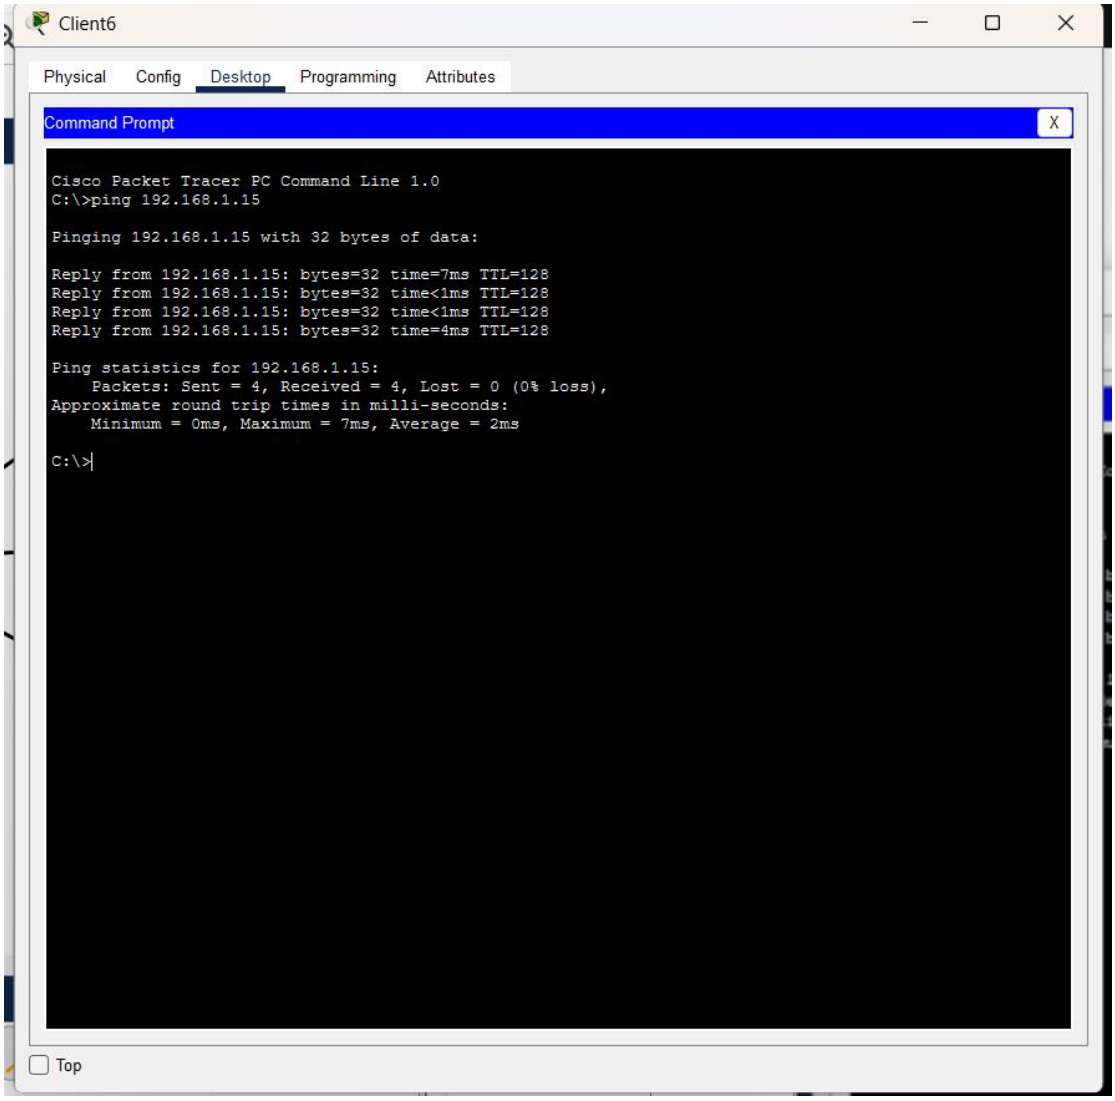

Reproduction de la 2èm topologie

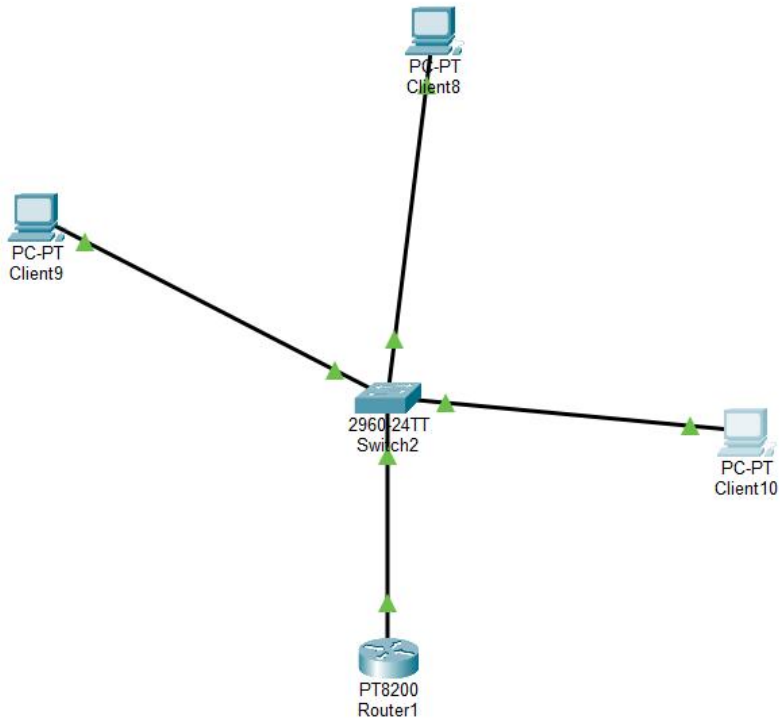

Assignation des adresses IPv4

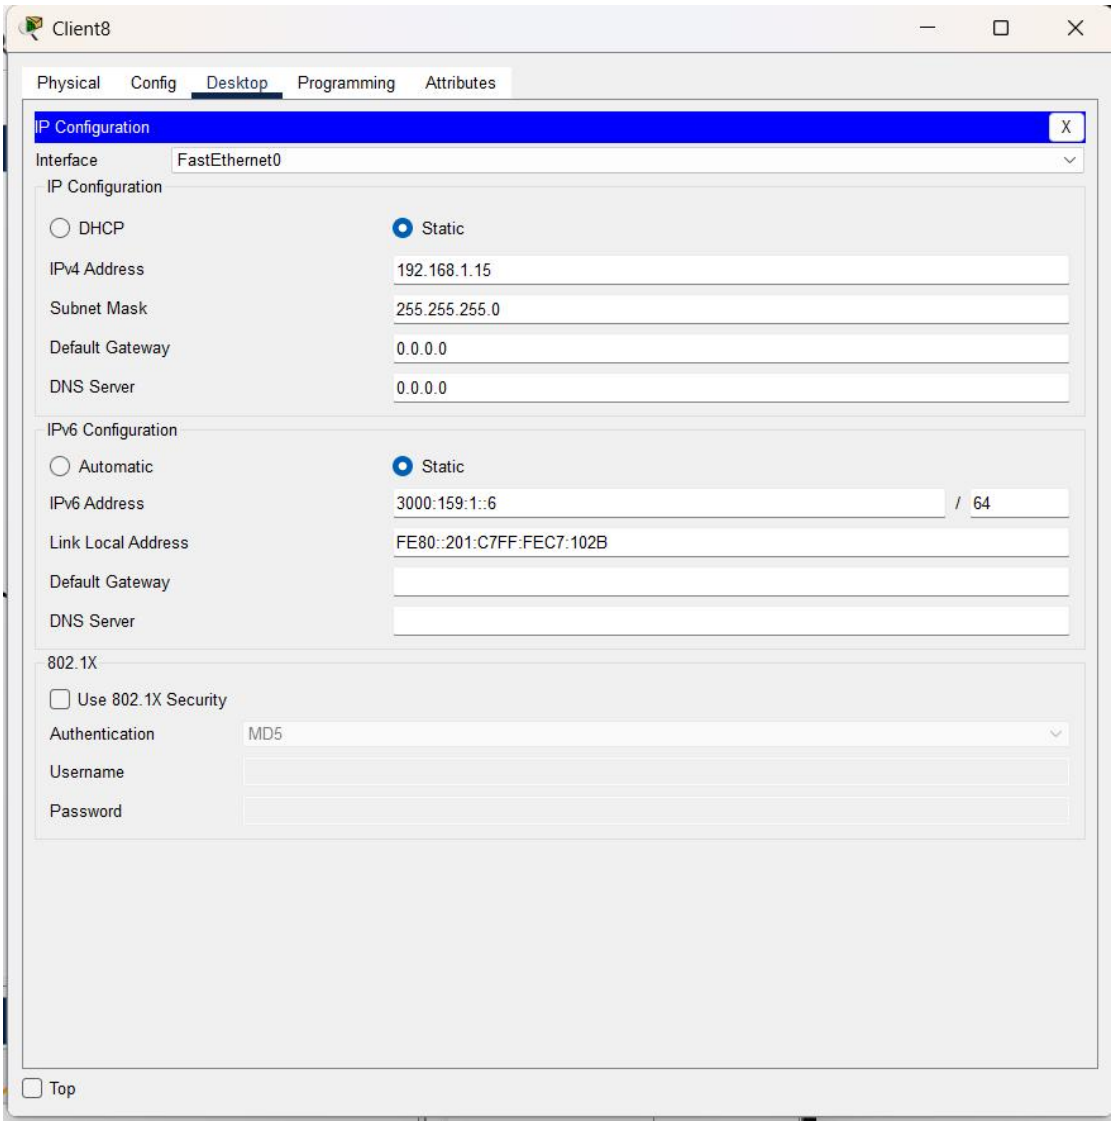

Vérification de la connectivité

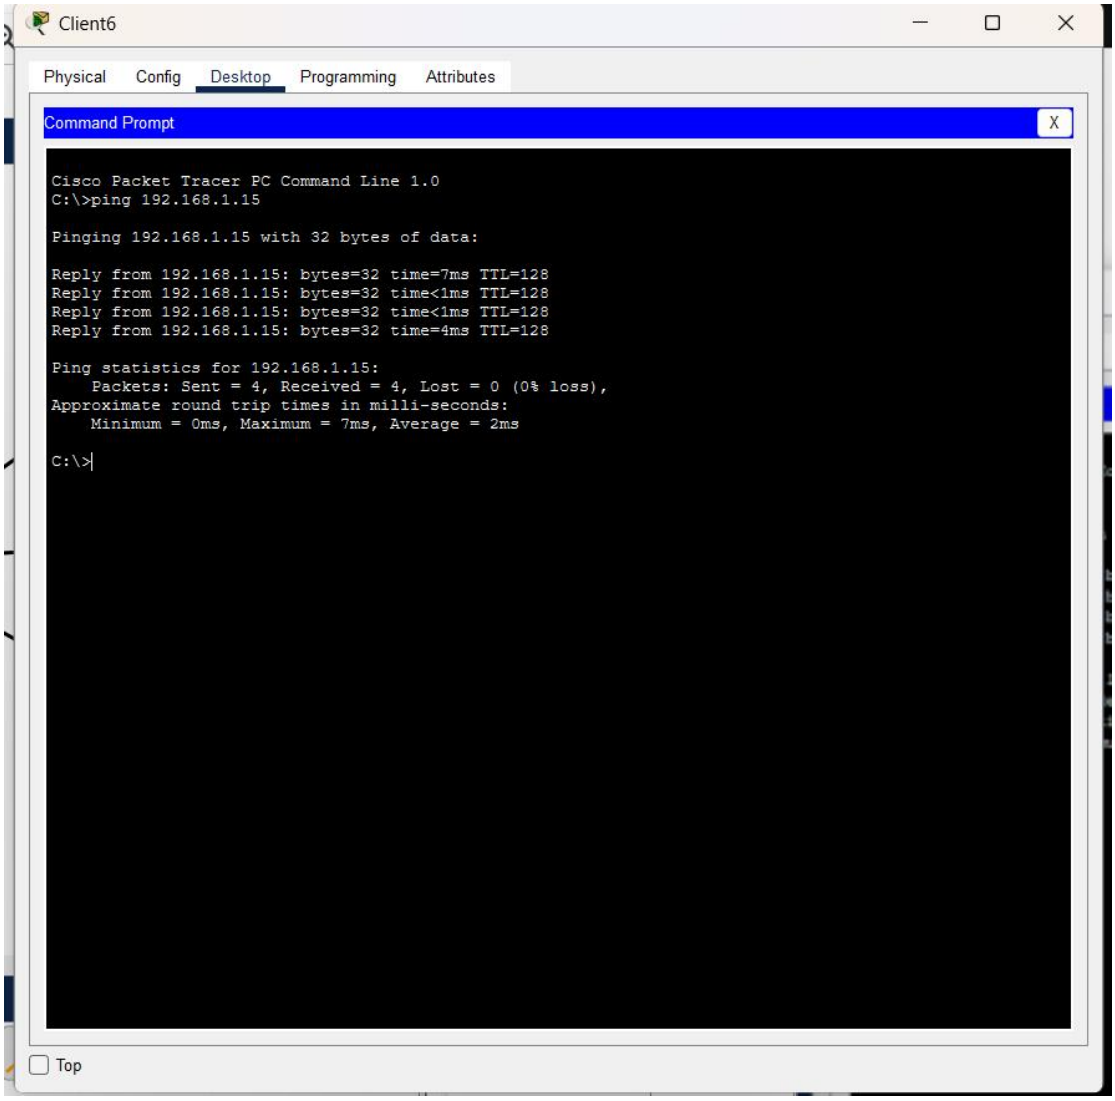

Reproduction de ma 1ère topologie (Arbre)

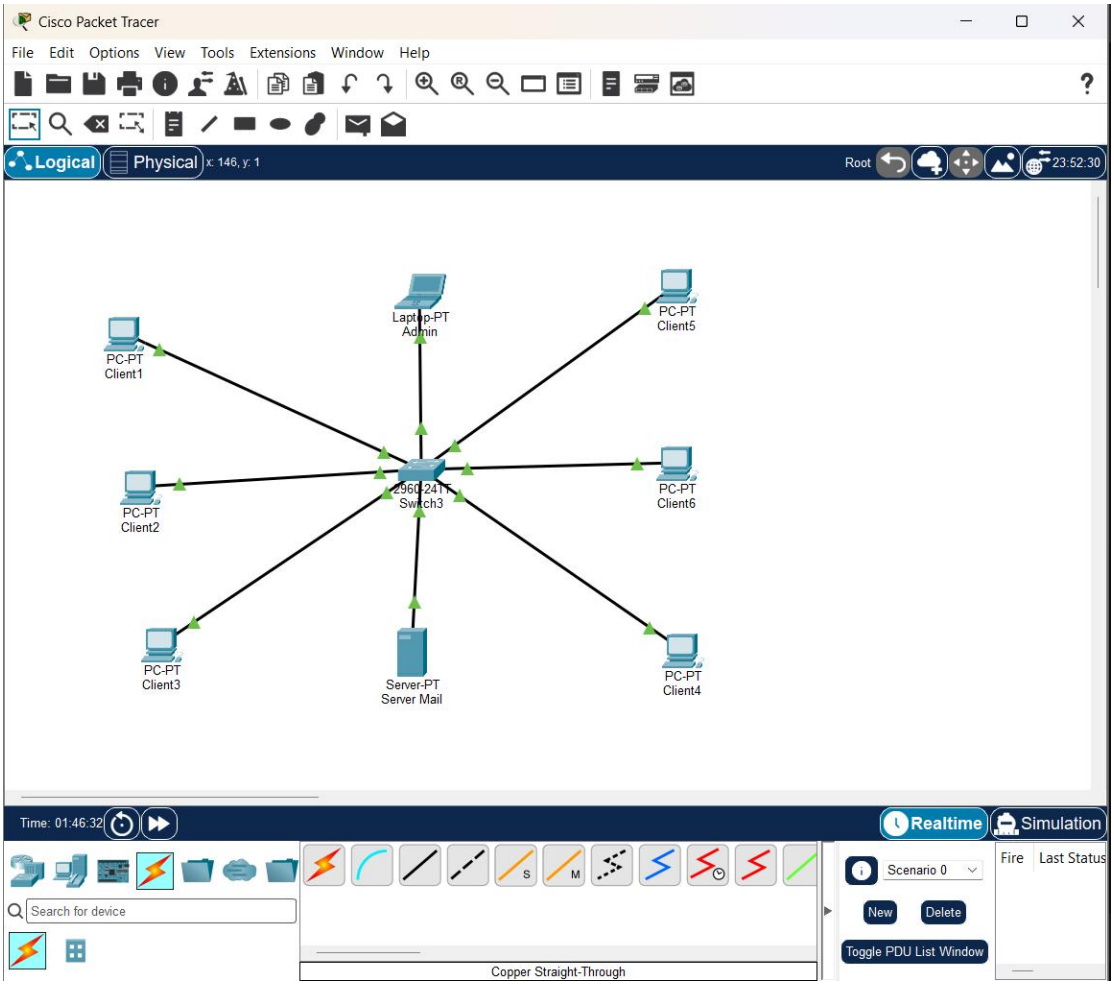

Assignation des adresses IPv4

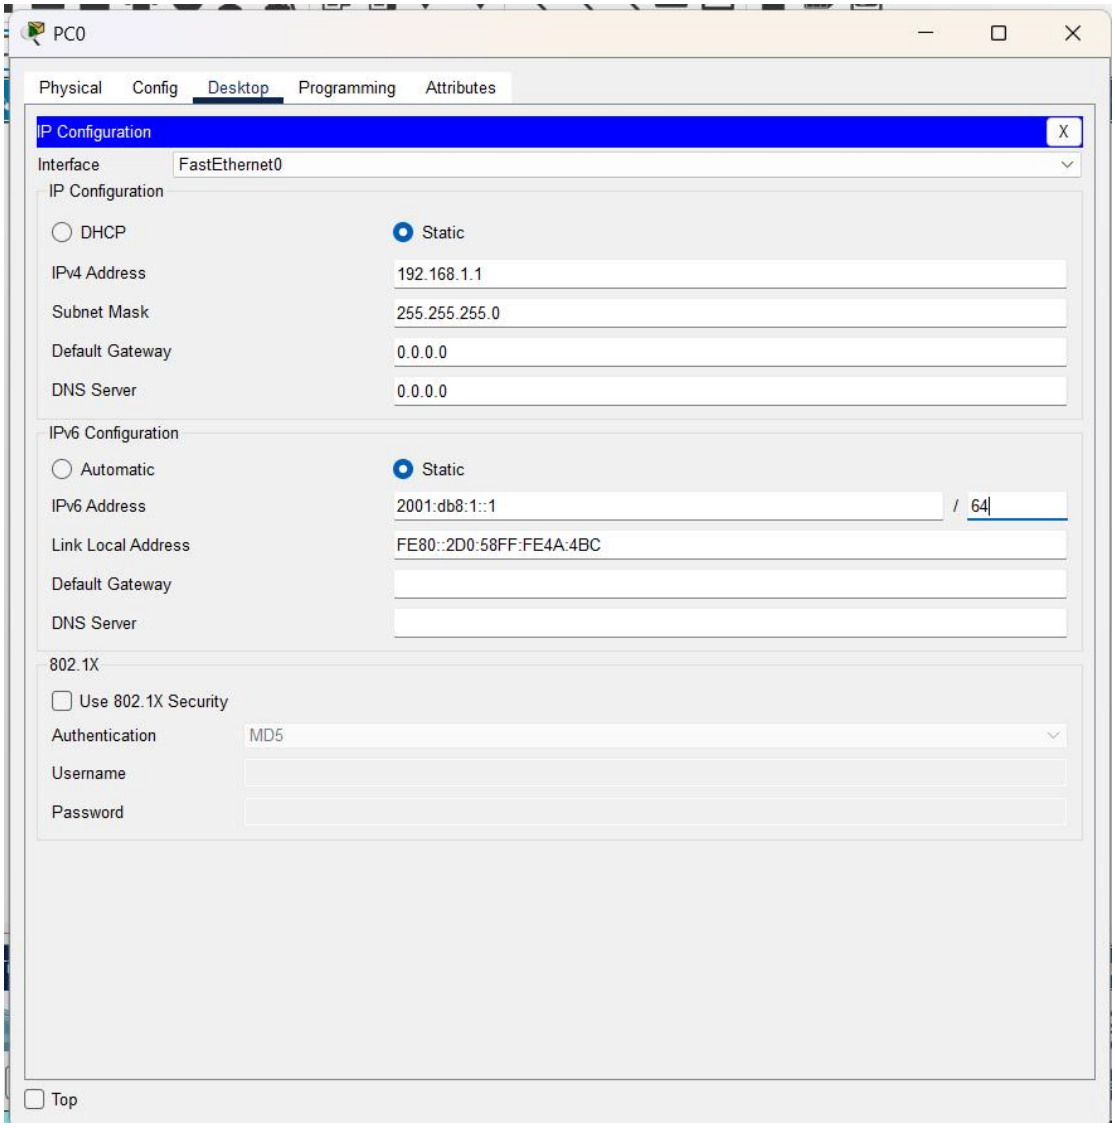

Vérification de la connectivité

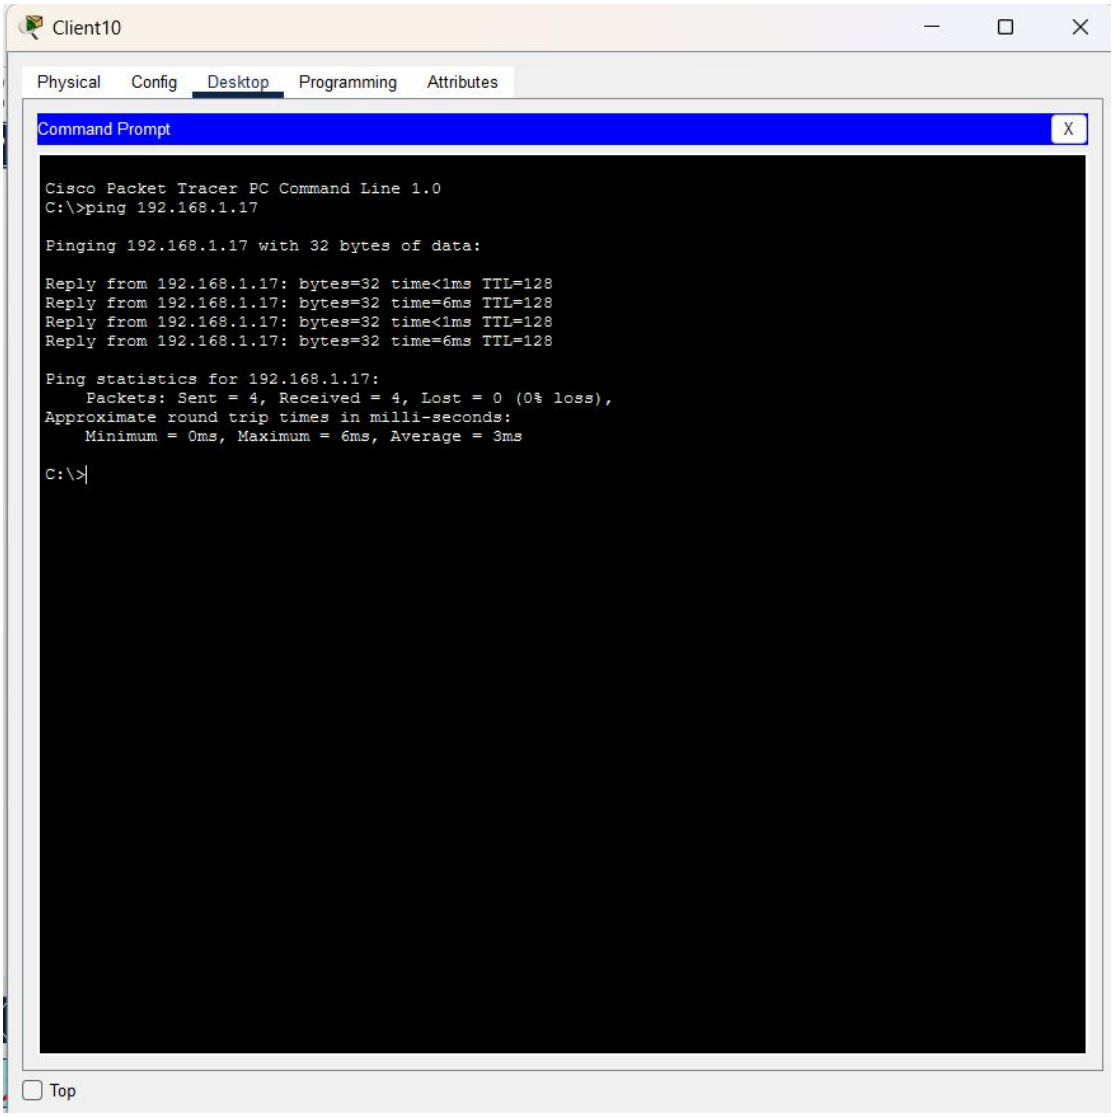

Topologie à faire

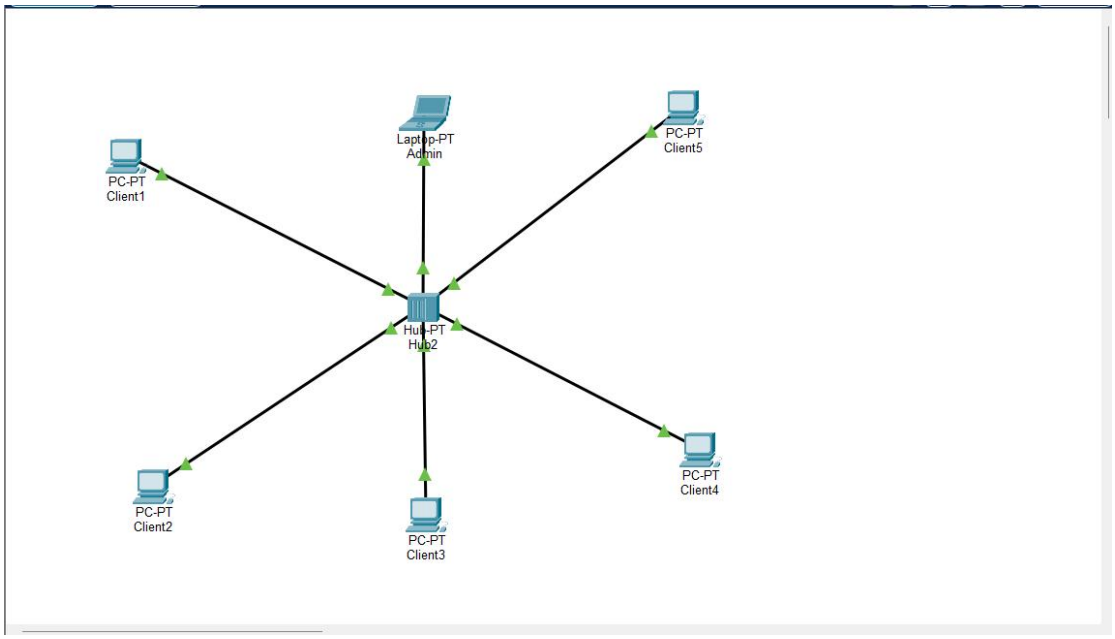

Assignation des adresses IPv6

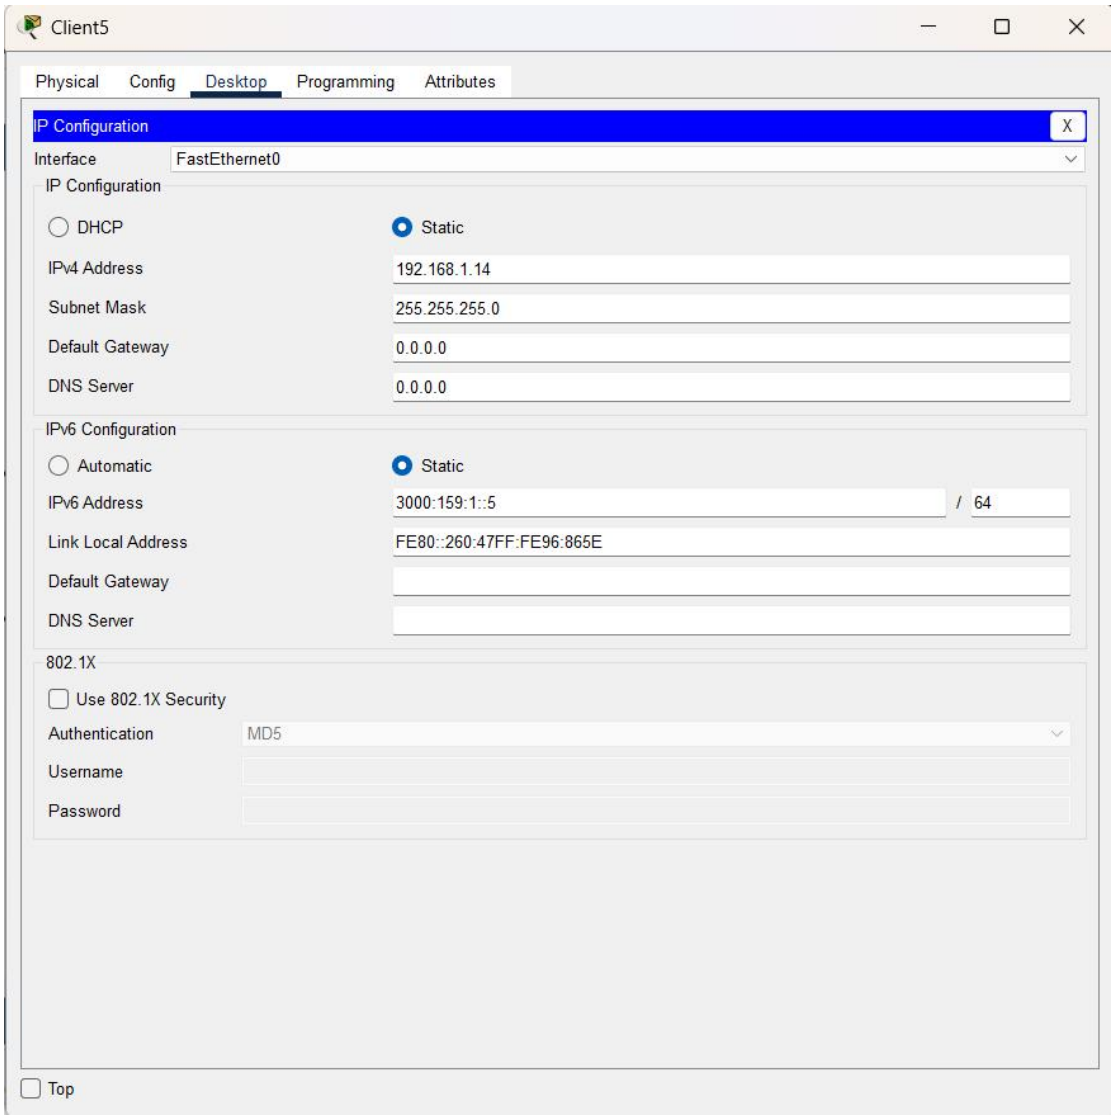

Vérification de la connectivité

Conclusion

Dans ce TD j'ai appris à attribuer des adresses IPv4 et IPv6 aux machines vérifier leur connectivité puis apprendre à m'adapter.
